Preface xi

1 INTRODUCTION: NEOCLASSICAL AND INSTITUTIONALIST PERSPECTIVES 1

1 Introduction 2
2 Neoclassical economics 4
3 Institutional economics 13
4 Differences between the schools of thought 18
5 Conclusion 21

2 CONSUMPTION

2 CONSUMER SOVEREIGNTY 27

1 Introduction 28
2 The neoclassical theory of consumption 29
3 The structure of the demand curve 41
4 Questioning the assumptions of consumer theory 47
5 Conclusion 56

3 CONSUMER DEPENDENCY 59

1 Introduction 60
2 Conspicuous consumption 61
3 Case studies in marketing and consumption 62
4 Implications for neoclassical theory 68
5 Problems with conspicuous consumption 70
6 The theory of ‘Distinction’ 72
7 Want creation by institutions 78
8 Conclusion 80

4 MEASURING WELFARE: ARE PEOPLE BETTER OFF? 85

1 Introduction 86
2 Utility in the development of welfare economics 88
3 The measurement of household well-being 92
4 Equivalence scales 99
5 Agency conceptions of human flourishing 103
6 Are judgements of well-being objective or socially generated? 106
7 Conclusion 108

5 HOUSEHOLDS

5 THE HOUSEHOLD IN THE ECONOMY 113

1 Introduction 114
2 Neoclassical approaches to household decision making 116
3 The division of labour within the household 123
4 The institutional economics of the household 132
5 Where next? 139

6 DECISION MAKING IN HOUSEHOLDS 143

1 Introduction 144
2 Decision making based on household utility functions 146
3 Co-operative and non-co-operative household decision making 153
4 The models compared 168
5 Gender and power in the household 173

7 CARING FOR CHILDREN 179

1 Introduction 180
2 Case study: declining fertility in the Mediterranean countries of Europe 181
3 Explaining care 184
4 Changing norms 193
5 Understanding change 199
# Firms

## 8 Modelling the Firm

1. Introduction
2. The case of Digital Equipment Corporation
3. Neoclassical theories of firms’ behaviour
4. New institutionalism and the boundaries of the firm
5. ‘Old’ institutionalism and evolutionary theory
6. Conclusion

## 9 Contracts, Information and Firms’ Behaviour

1. Introduction: contracts and markets
2. Time and contracts: short- and long-term contracting
3. Incomplete information and contracting behaviour
4. Incomplete information: incentives and firms’ objectives
5. Conclusion: contracting and firms’ behaviour

## 10 Firms and Efficiency

1. Introduction: efficiency, competition and strategy
2. Production techniques and the production function
3. Choice of technique and scale by the profit-maximizing firm
4. Static and dynamic efficiency of firms
5. Conclusion

## 11 A Strategic View of Competition

1. Introduction: the ‘cola wars’
2. Market structure and barriers to entry
3. Strategic entry deterrence
4. Strategy and market behaviour
5. Collusion
6. Trust
7. Conclusion

# Labour

## 12 The Firm and the Labour Market

1. Introduction
2. The neoclassical approach to labour demand
3. Labour market equilibrium
4. Labour market adjustment
5. Influences on equilibrium unemployment
6. Conclusion

## 13 Discrimination and Segmentation

1. Introduction
2. Labour market disadvantage
3. Forms of discrimination
4. Neoclassical models of discrimination
5. Segmented labour markets
6. Feedback effects in the labour market
7. Conclusion

## 14 Trust and Control: Labour Use within the Firm

1. Introduction
2. The distinctive characteristics of labour
3. Trust and control
4. New institutionalist theories of the employment contract
5. Efficiency wages: discipline, supervision and commitment
6. The theory of hierarchical control systems
7. New employer strategies towards labour
8. Conclusion

# Technology and Finance

## 15 Technological Change

1. Introduction
2. Technological change in the Industrial Revolution
3. The production function, technological change and economic growth
4 Technological change and general equilibrium analysis 425
5 Linear models of innovation 429
6 The steam engine 432
7 An evolutionary view of technical change 437
8 Conclusion 443

Appendix: Solow’s growth accounting model 444

16 Evolutionary theories of technological and economic change 449
1 Introduction 450
2 Evolutionary theories of economic change 450
3 Path dependency and economic evolution 465
4 Methodological issues: theory and evidence 471
5 Conclusion: economic experiments and economic growth 473

17 Financial systems and innovation 475
1 Introduction 476
2 Stock market-based and bank-based financial systems 477
3 Financial systems and innovation 483
4 Innovation: differences among industries 485
5 Conclusion 489

18 Competitive General Equilibrium 493
1 Introduction 494
2 The Walrasian model 495
3 The determination of prices 499
4 Some more models of general equilibrium 505
5 Competitive equilibrium and welfare economics 519
6 Conclusion 525

19 Social Markets 529
1 Introduction 530
2 ‘Managed markets’ and ‘quasi-markets’ in health care 533
3 Private provision through public contracting: auction markets in social goods 543
4 Making social markets work: social norms in social markets 546
5 Conclusion 552
