

Chapter 9: Hands-on Activity – Computer Crime

A computer can be as a tool to commit a crime. Some people commit the crimes for the challenge and others for the monetary gain.

1. In the browser, type www.cybercrime.gov
2. Click on the **Computer Crime** tab
3. Click on the **Cases** link
4. Click on one of the links to read about a computer crime that interests you
5. Answer the following questions about the crime:
 - a. Who committed the crime?
 - b. Where was the crime committed?
 - c. What was the age of the person that committed the crime?
 - d. What crime was the person charged with?
 - e. What sentence did the person receive (prison time/monetary fine)?

Chapter 9: Hands-On Activity – Computer Viruses

A virus is a program that attaches itself to other programs. An infected user must take some sort of action to spread a virus to others. A worm functions as an independent program, replicating its own program files until it interrupts the operation of networks and computer systems. Use the Internet to search the Web site

<http://www.centralcommand.com> for the five common computer viruses or worms.

Create a Word table that lists the computer virus. Save the file as **Ch9Virus.doc**.
